

HUMIDIFIER HUMI-3 E

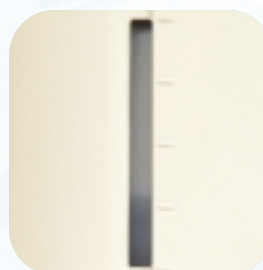

HUMI-3 E domestic portable dehumidifier with LCD function and humidity level status.

Characteristics:

The HUMI-3 E portable domestic dehumidifier is designed to accurately regulate the humidity with a given environment between 40 and 85% RH. The unit can be operated either manually with continuous operation, or automatically by humidistat operation. The HUMI-3 E is fitted with an electronic sensor that monitors the humidity level and switches the unit on/off according to the preset requirements. All of the functions and operational status of the HUMI-3 E are shown on the LED screen including water tank overfill indication.
