

VISIONAIR BLUE LINE

SMOKEFREE GLOBAL

With the VisionAir BlueLine SmokeFree you clean the air in smoking rooms. The SmokeFree Global has a media / hepa filter that can be used worldwide, also in countries where no service contract for maintenance can be concluded. Depending on the content of the room you can opt for a VisionAir Blue Line 1 or a VisionAir Blue Line 2. Both can be mounted to or in the ceiling. The VisionAir Blue Line 1 can also be mounted on the wall and on a movable display.

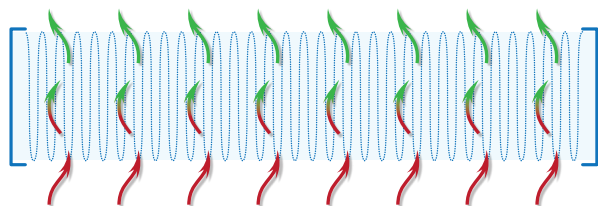

FILTER PRINCIPLE

The VisionAir Blue Line SmokeFree contains a unique filter system, which cleans indoor air in three phases.

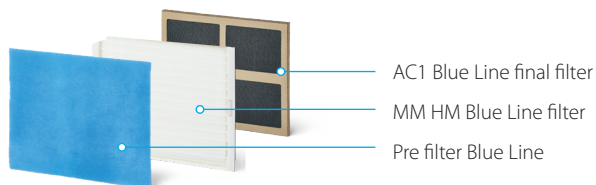

Phase 1: the **pre filter Blue Line** captures the bigger particles of dust and other polluting items such as hairs and skin flakes.

Phase 2: the **MM HM Blue Line filter** is a combination filter for the removal of coarse and fine particles, but also tobacco smoke. This filter has a large surface resulting in a low air resistance and a high filter capacity. It filters up to 99.95% of the most penetrating particles (MPPS).

The MM HM Blue Line 2 phase filter in operation:

Phase 3: the **AC1 Blue Line final filter** is a special activated carbon filter that captures odours and tobacco smoke.

DIMENSIONS VISIONAIR BLUE LINE 1 SMOKEFREE

Dimensions L x W x H	630 x 620 x 290 mm
