

# **SFE** 25/50/75

The SFE is an electrostatic filter for kitchen exhaust air. The SFE is designed to be installed in the extraction duct of a commercial kitchen up stream of the extraction hood. Depending on the levels of grease and smoke, several units can be joined to create double pass systems. The SFE range, designed with commercial kitchens in mind, features a low pressure drop and an integrated oil collector which ensures easy oil removal.

### **APPLICATIONS**

The SFE range **is intended** to be used for the following applications:

• filtration of extracted fumes from commercial kitchens

Do **not** use the SFE range for the following applications or in the following circumstances:

- extraction of hot air, gases or vapours (>45°C)
- high concentrations of mill dust, flower dust etc.
- relative humidity >80%
