

Outlet louvre shutter side

Inlet guard side

Wall mounted axial flow fans with galvanised steel sheet structure, outlet louvre shutter with mechanical opening, inlet guard from galvanised steel and belt driven impeller from aluminium sheet (except Ø 800 direct driven models), powered by single phase (HIB) or three phase (HIT) motor. IP55, Class F.

Motors

Electrical supplies:

Single phase 230V-50Hz.

Three phase 230/400V-50Hz.

High-efficiency, IE2: three-phase models from 1,1 and 1,5 kW.

On request

60 Hz models and models without shade, with defense on the discharge side can be supplied.

Specific applications

Agricultural extract or supply applications

Compact design

Robust casings manufactured from galvanised steel sheet.

Outlet louvre shutter with automatic opening

when switching on the fan, to avoid its opening when it is not working.

Metallic protection guard on the inlet side, made from galvanised steel.

Protected belt-driven assembly

Trapezoidal belt drive protected by a belt guard from PVC.

Ø 800 direct driven models.

TECHNICAL CHARACTERISTICS

Before making any electrical connection ensure that the voltage and frequency of the mains electrical supply matches that of the fan data plate label.

PERFORMANCE CURVES

- q_v : Air volume in m^3/h and m^3/s .
- p_{sf} : Static pressure in Pa.
- Dry air at 20°C and 760 mmHg.
- Performance data in accordance with ISO 5801 and AMCA 210-99 Standards.

MOUNTING ACCESSORIES

Safety guard kit

Electro-welded steel mesh protection guard with frame to fit at fan discharge to prevent access to the moving parts. The installations must include this accessory to comply with the European Machinery Directive if the lowest point of the fan is mounted at less than 2,5 m from the floor level.

Black-Out Kit

Metallic protection Panel which avoids the entry of natural light. Specially recommended for poultry ventilation applications.

KIT FOR FIXING THE HIT/HIB WALL

Fixing profiles for correct installation of the fans to the wall.
